ENEWS: A Monthly Forum for Sharing and Interchange

Source: UCLA SCHOOL MENTAL HEALTH PROJECT/ CENTER FOR MENTAL HEALTH IN SCHOOLS

September, 2001 (Vol. 5 #12)

WHAT IS ENEWS? (For those who don't know)

This forum is another link for those concerned with enhancing policies, programs, and practices related to addressing barriers to student learning and promoting mental health in schools. It augments the other ways our Center shares information and facilitates interchange/networking.

EMERGING ISSUE

What Should School Professionals be Taught with Respect to Addressing Barriers to Student Learning?

From various sources, programs that prepare school professionals (pre and on-the-job) are coming under attack for what critics see as resistance to changes that are essential to ensuring that all youngsters have an equal opportunity to succeed at school.

Some critics are concerned that the curricula for teacher preparation is not changing in keeping with research on effective methods of instruction. Others emphasize the failure of education schools and departments and on-the-job (inservice) training to teach about what schools and teachers must do to play a significant role in addressing barriers to student learning. Among this latter group are those who caution that a shift to positive behavioral control and management of students may underscore the need for change, but the approach ignores the need for a major transformation in the nature and scope of what school personnel are taught.

The bottom line is that there is increasing pressure for changes in what teachers and other school professionals are taught. The emerging issues are what types of changes should be made in what and how they are taught, which of course stem from the age-old question of what they really need to know in order to be effective.

Where are you on this issue? Post your response directly on our website's Net Exchange page for others to read and respond. Go to http://smhp.psych.ucla.edu Or you can send your response to: E-mail: smhp@ucla.edu Phone: 310/825-3634 Write: Center for Mental Health in Schools, Department of Psychology, UCLA Los Angeles, CA 90095-1563

"We believe that public schools can begin by educating teachers, administrators, and other staff about the nature of mental health problems among young people and the tremendous opportunity for intervention." David Satcher, Surgeon General

NEWS FROM AROUND THE COUNTRY

>>20 Percent Increase for drug related emergency department visits for youth age 12 - 17<<

Substance Abuse and Mental Health Services Administration's (SAMHSA) 2000 Emergency Department Data from the Drug Abuse Warning Network released these and other trends for 21 metropolitan areas. See: http://www.samhsa.gov

>>Suicide Does Not Beget Suicide<<

CDC study published in the July 15 edition of the American Journal of Epidemiology, based on interviews with 153 people who survived a suicide attempt, found the risk of trying to commit suicide does not increase after exposure to suicidal behavior. http://www.aje.oupjournals.org.

>>Mental Health: Culture, Race, and Ethnicity<< On August 26th, the Surgeon General presented this Supplement to his Mental Health Report at the American Psychological Association Meeting in San Francisco. (http://www.apa.org).

>>Temporal Variations in School-Associated Violent Deaths<<

CDC analysis of data from 1992 - 1999 found school associated homicide events occurred one every 7 schools days with rates highest at the beginning of each semester. Suicides occurred one every 31 school days with the rates higher during the spring semester. See Morbidity and Mortality Weekly Report online at http://www.cdc.gov/mmwr/international/relres.html

>>Public Review of Guidelines for Health, Mental Health, and Safety in Schools<<

The guidelines being developed as part of a cooperative agreement between the Health Resources and Services Administration, the American Academy of Pediatrics and the National Association for School Nurses are now on the web for public review. You are invited to comment and suggest an additional guideline of your own, when you feel that's necessary. The web-site will close on September 20, 2001. Comments will be incorporated and then a revised set of guidelines will be made available both on a web-site and in print. See http://www.nationalguidelines.org

>>Youth and Family Centers of the Dallas Independent School District received a commendation for exemplary programs and practices in the Texas School Performance Review which credited the mental and physical health services with contributing to improved attendance, a reduction in dropouts and fewer discipline referrals. http://www.dallasisd.org. (News releases)

>>Three new Promising Practices guides available<< SAMHSA's Center for Mental Health Services' Promising Practices in Care of Children with Serious Emotional Disturbances has added Wraparound: Stories from the Field; Learning From Families: Identifying Service Strategies for Success; and Promising Practices in Early Childhood Mental Health. The 3 new and 10 previously published volumes may be ordered free at http://www.cmhs.samhsa.gov.

"Our evaluation of the children's program has shown that the systems of care approach resulted in improved mental health as well as improved school grades, improved living conditions, reduced school absences and trouble with the law."

Joseph H. Autry, SAMHSA Acting Administrator

**REQUESTS/INFORMATION/COMMENTS/QUESTIONS FROM THE FIELD

Comments responding to last month's emerging issue on Teacher Turnover: Dropout or Pushout? Are there mental health implications?

- "...Regardless of what life endeavors we attempt to discuss, the inability of increasing numbers of otherwise normatively healthy people to functions in organizational and institutional systems has a great deal more to do with the lack of responsiveness to their basic human needs than it does with their inability or unwillingness to meet the needs that are placed before them..."
- "...I am quite convinced that mental health issues lie at the core of the recent alarming rates of teacher attrition...As our society becomes increasingly stressed and distressed, it is predictable that attrition rates will rise while, at the same time, the number of 'new recruits' declines..."
- "...I suspect that the increased demand on elementary teachers to deal with more significant mental health issues in students contributes to teacher burn out. I believe that elementary teachers need more exposure to childhood mental illness in their preservice training to better equip them for the challenges of today's classrooms..."
- "...I feel the number one reason people leave teaching is that they do not feel supported by high-level school administration...Teachers have to deal with low salaries, discipline problems, and overcrowded classrooms. However, many teachers can tolerate these conditions as long as administrators are caring, supportive, and follow up on teacher concerns."
- "...What are the research questions/designs to document and remedy this phenomenon? Are there data available to conduct such research?"
- "...One factor we continually leave out of the discussions of dropout/pushout is the space in our schools...we could not possibly accommodate the so called dropouts if they were willing to work at schoolwork. Our school boards count on a certain number of dropouts when they budget for the next year...Personally, I think we have a lot of nerve personalizing the dropout situation and thus denigrating those kids when the subtle reality is that the more vulnerable will leave because the situation...demands it..."

You can join the discussion on the Net Exchange http://smhp.psych.ucla.edu.

Request:

An administrator of a public mental health program endeavoring to support school based programs shared his concern that the "fee for service" financing of public mental health "triggers all the managed care organization gatekeeping processes including the intense focus on a narrow band of diagnoses...I would like to hear some discussion on how to get school administrators and mental health administrators and legislators on common ground so that public mental health agencies could deliver the services actually needed by children and schools (as opposed to providing medical model diagnoses and treatments mandated by managed care)..."

If you have information you would like to share with him, please send it to us at smhp@ucla.edu and we will send it along and share it with others with similar concerns.

**NEWS FROM THE TWO NATIONAL CENTERS FOCUSING ON MH IN SCHOOLS **

^^^ Updates from our Center at UCLA:

>>> The Center just completed an initial study to evaluate the impact of its training and technical assistance. This is a pilot effort and is being shared broadly with others to elicit feedback on strategies for evaluating the impact of TA centers. If you would like to join in a discussion on resource center impact evaluation strategies, contact the Center for a copy of the report (smhp@ucla.edu)

>>> Mental Health in Schools: Guidelines, Models, Resources & Policy Consideration" <<< The Executive Summary of the document was recently sent as an email attachment to the ENEWS listserve with the expectation that like the ENEWS, it would be passed on to others. It is encouraging to see the strong interest. Several national organizations and initiatives have disseminated the document to their membership and included it in policy discussions. Since it's addition, the PDF download of the document has been the most popular hit on our website http://smhp.psych.ucla.edu.

>>>QUICK FINDS<<<

This do-it-yourself technical assistance tool puts in one place Center materials, online reports, and specialized resource centers organized by topic areas. There are over 90 topics online. New this month: >Fact Sheets related to Addressing Barriers to Learning

>Homeless Children and Youth

- >Native American Students
- >Self-Esteem

Go to http://smhp.psych.ucla.edu. And click on the banner Quick Finds, scroll through the Center Responses to see the 90 plus topics.

>>>Quarterly Newsletter about to be mailed. If you aren't on our mailing list and want to be added let us know. The Summer issue [Vol.6(3)] features state-wide initiatives in Hawai`i and Maryland plus ideas on addressing school avoidance, a commentary "The End of Support Services as we know them," and more. If you don't receive this hardcopy newsletter and want to, contact smhp@ucla.edu to be added to the mailing list. To view the current or previous newsletters go to http://smhp.psych.ucla.edu/news.htm.

>>>School based mental health practitioners listserve launched
Over 170 practitioners are linked in an interactive discussion group designed to
(1) enhance networking through enhancing sharing of information, ideas, and
specific practices, (2) support practitioners efforts to enhance the priority given to
MH in schools in policy, practice, training, and research, (3) support efforts to
reduce fragmented efforts and unnecessary redundancy in activity and enhance
interdisciplinary interactions, (4) provide mechanisms for addressing issues
related to role and turf. The initial requests for information were for programs to
prevent bullying and more broadly to create a welcoming environment and sense
of community at schools. There was also a request for strategies for public mental
health funding not based on a diagnostic fee for service model. If you want to join
the discussion let us know. We will send you a once a week "digest" of all the
comments. Send your email address to smhp@ucla.ed.

If there are materials you need in your efforts to improve outcomes for children, let us know. If we haven't addressed the topic, we will undertake to do so. Contact us at

THIS IS THE END OF THIS ISSUE OF ENEWS Below is a brief description of our Center at UCLA

= = = = = = = = =

WHO ARE WE?

Under the auspices of the School Mental Health Project in the Department of Psychology at UCLA, we established a Center for Mental Health in Schools in 1995. The Project and Center are co-directed by Howard Adelman and Linda Taylor.

Our group at UCLA approaches mental health and psychosocial concerns from the broad perspective of addressing barriers to learning and promoting healthy development. Specific attention is given to policies and strategies that can counter fragmentation and enhance collaboration between school and community programs.

We are involved in model development and implementation, training and technical assistance, and policy analysis. Our activities include gathering and disseminating information, materials development, direct assistance, and facilitating networking and exchanges of ideas.

For more information about the Center or about ENEWS, contact Center Coordinator Perry Nelson or Center Do-Directors Howard Adelman or Linda Taylor at
